<https://www.muroran-it.ac.jp/>

< To Applicants >

◎ **You must discuss your research theme thoroughly with a faculty member whom you want to be your supervisor before submitting your application.**

◎Muroran Institute of Technology has established the “Muroran Institute of Technology Security Trade Control Regulations” in accordance with the “Foreign Exchange and Foreign Trade Act”, and rigorously screens Foreign students.

Foreign applicants who fall under any of the conditions set out in said regulations maybe unable to enter their desired course or program.

◎All dates and times stated in this guideline are based on Japan Standard Time

On the Handling of Personal Information

Muroran Institute of Technology (Muroran IT) complies with Personal Information Protection Act and other applicable ones and attempts to protect your personal information in accordance with Muroran IT's Personal Information Management.

Personal information submitted to Muroran IT in the form of application documents will be used for selecting applicants for admission and as resources for reviewing the method for selecting applicants for admission. For admitted students, personal information will be used for registrar (student registry, learning assistance, etc.) and student support (tuition exemption, scholarship, etc.).

Admission Policy

<Students we seek>

1. A student who has a wide-ranging education and international perspective.
2. A student who has high ethical standards.
3. A student who has practical research competency and applied skills regarding science and technology.

<Basic policy of screening>

1. A variety of screening methods will be conducted in order to accept students with great individuality.
2. Emphasis will be placed on the applicant's knowledge and adequate command of a specialized area.
3. The ability to collect and send information in English will be valued.

About Supervisors

About a syllabus

(<https://www.muroran-it.ac.jp/kyomu/syllabustop2020/0-r2top-page.htm>)

○ Practical education program through development of a novel functional index to prevent brain aging(Brain - Food PGP)

This program provides education and/or research through the development of novel functional index for foods that contribute to the prevention of dementia, a global health priority. In order to develop new index for foods, not only biology and chemistry, but also a wide range of knowledge and research such as analytics and information science are required. In this program, a multidisciplinary and practical education is conducted with the support of companies related to agriculture and food.
